

# Self-Serve Custom Analysis: Jet and Power BI

Jet Reports and Jet Analytics from insightsoftware are the right software partners for your Power BI experience. Jet is designed for easy self-service reporting, removing the need to lean on your IT department for support. With a pre-built data warehouse and cubes, Jet can easily manage all your data, from multiple sources, and connect Power BI to generate real-time reports with stunning, custom visualizations.

# Experience The Connect Effect

Providing finance and accounting professionals with custom visualizations and dashboards, Power BI is useful technology for basic business intelligence. However, generating custom reports can be challenging without technical expertise. Jet overcomes these barriers offering a platform that connects to all your data sources in real time, enabling intuitive report building and deep business insights.

## ➤ Accuracy

Ensure consistency by seamlessly connecting and consolidating multiple live data sources. All dashboards use the same governed data source of agreed-upon definitions and measurements for consistent decision making.

## ➤ Speed

Enable self-service with intuitive custom report building with shared semantic layers. Drive performance by boosting refresh times, eliminating bottlenecks, and optimizing systems usage.

## ➤ Longevity

There's no need to create a new data model for each analysis. Simply connect Power BI to Jet Analytics' cubes or tabular models and build your dashboard right away.

## ➤ Control

Ensure that the right users have access to the right data in the way that they need to see them.

## ➤ Value

Reduce cost of ownership by getting value five times faster than traditional data warehousing methods.

**"We added Power BI and Jet Analytics in 2019 and it has made our operations a lot smoother. The combination of these products helps us analyze our data, eliminate most manual processes, and simplify the reporting we need. Ultimately, it enables us to visualize everything easily in Power BI."**

**– Florian Brunet-Lecomte,**  
President, Femat
